(54) TACHOGRAPH AND RECORDING MEDIUM
LOADING DEVICE USED FOR SAME

(57) Abstract:

PURPOSE: To provide the tachograph and recording medium loading device which secure no difference between chart paper recording contents and memory data recording contents.

CONSTITUTION: A main body 1 has a cartridge attaching and detaching mechanism which stores a cartridge 40 containing chart paper 50 detachably. This device is equipped with a timer mechanism which rotates the chart paper in the cartridge, a recording mechanism 18C which mechanically records vehicle information on the chart paper, etc. A cartridge-side storage means 160 where the vehicle information corresponding to the mechanical recording performed on the chart paper by the recording mechanism is electrically recorded is incorporated in the cartridge. The recording medium loading device which loads the chart paper in the main body detachably has a chart paper storage part and the cartridge-side storage means 160 where the vehicle information corre-

sponding to the mechanical recording performed on the chart paper by the recording mechanism is electrically recorded.
